Light Conductors. 12.

According to the law of conservation of energy, "Energy can neither be created nor destroyed but simply changes form into something that can be used." A wire is always needed to conduct energy from a generator or solar panel to the light bulb and a light bulb is a simple apparatus that converts electrical energy into light energy.

However, the Light of God cannot be destroyed under any circumstance because the Lord Jesus Christ—the God-Man, declared that He was *"**the Light of the world**"* John 8:14. And that every believer should be a reflector of that *Light*: *"Ye are the light of the world. A city that is set on an hill cannot be hid. Neither do men light a candle, and put it under a bushel, but on a candlestick; and it giveth light to all that are in the house. **Let your light so shine before men, that they may see your good works, and glorify your Father which is in Heaven**"* Matthew 5:14-16.

Because God knows it is impossible for you and me to generate light in and of ourselves, He displayed His own Light in the person of the Lord Jesus Christ and it is an inexhaustible supply!

Dependent faith is the conductor that transmits Life and Love, from its Source in the Eternal Godhead to the heart of the believer that he 'in turn' will **transmit the Light and Love of the Lord Jesus to others**. Are you willing to be 'His Light Conductor' in this world of spiritual darkness? Why not prayerfully respond to Him, even now as He is speaking to you?
